Please note the amount of your donation and the selected trust or fund on the renewal form. Alternately mark the amounts on this page, insert your Member number and return both to PSA.

Pharmacy Research Trust – NSW

The Pharmacy Research Trust was established to promote, foster, develop and assist in all possible ways the furtherance of research and post graduate education and study in all branches of pharmacy provided the research, post graduate education and study is related to research into the causes, prevention or cure of disease in human beings, animals or plants.

Funding is offered under two categories: Research grants and seed funding grants. Research project grants may include requests for research maintenance/personnel or scholarships for postgraduate students. Seed funding is available for new investigators and researchers of fewer than three years standing. Seed funded projects should be capable of leading to sufficient results to enable subsequent applications for funding to larger granting bodies. All research projects will have a maximum duration of two years.
