

For pharmacists in 2023 to address the health needs of all Australians, we have identified 11 actions for change:

	01. Empower and expect all pharmacists to be more responsible and accountable for medicine safety.
	02. Enhance the role of community pharmacists to have a greater level of responsibility and accountability for medicines management.
	03. Embed pharmacists within healthcare teams to improve decision making for the safe and appropriate use of medicines.
	04. Facilitate pharmacist prescribing within a collaborative care model.
	05. Improve pharmacist stewardship of medicine management to improve outcomes at transitions of care.
	06. Utilise and build upon the accessibility of community pharmacies in primary care to improve consumer access to health services.
	07. Equip the pharmacist workforce, through practitioner development, to address Australia's existing and emerging health challenges.
	08. Establish additional funding models and facilitate access to existing funding models to recognise the value and quality of pharmacist care.
	09. Allow greater flexibility in funding and delivery of pharmacist care to innovate and adapt to the unique patient needs in all areas, with a specific focus on regional, rural and remote areas.
	10. Develop and maintain a research culture across the pharmacist profession to ensure a robust evidence base for existing and future pharmacist programs.
	11. Embrace digital transformation to improve the quality use of medicines; support the delivery of safe, effective, and efficient healthcare; and facilitate collaborative models of care.
